

Supply Chain Warehouse Operative Level 2

On-Programme Learning

The employer and training provider will use the Warehouse Operative standard and the list of learning outcomes) to develop a training plan. Apprentices will be required to demonstrate continuous and sustained progress towards the end point assessment, by completing work as set out by their employer, demonstrating the knowledge and skills required in the relevant role. They may achieve nationally-recognised vendor or other qualifications if the employer chooses such as Fork Lift Truck qualifications.

Apprentices will also wish to compile a portfolio of evidence to help them keep a record of their progress.

The apprentice will complete the following qualifications.

- Level 2 Certificate in Warehousing and Storage.
- Level 2 English and Maths (if not already achieved).

Employers will work closely with Davidson Training to plan and deliver support and training appropriately. This will add value to the employer as it centers on real work competencies demonstrated in a real work environment. Davidson Training will support ensuring the requirements of the apprenticeship standard are reflected in the above processes, and by filling any gaps through their work with apprentices.

To drive quality and consistency through on-programme learning employers may wish to consider the use of their normal performance management processes to monitor the progress of the apprentice, provide feedback and guide development.

We will carry out joint reviews of progress at regular intervals, involving apprentices, line managers and others with a direct relationship, e.g. mentors, workplace coaches, etc.

Apprentices will develop and maintain examples of their work throughout their apprenticeship that cover the full standard. This will be in the form of a portfolio to be reviewed on- programme at intervals of 3, 6 and 9 months.

Duration: The apprenticeship will take a minimum of 12 months to complete

Entry requirements: Apprentices will be required to have or achieve level 1 English and Maths and to have taken level 2 English and Maths tests prior to completion of their Apprenticeship.

End Point Assessment

The end point assessment is synoptic and takes place at the end of the apprentice's learning and development, after a minimum of 12 month's on programme learning.

There are two assessment methods: The Knowledge and Behaviours Test and to pass this assessment learners will need to demonstrate full competence in the necessary knowledge and behaviours required for a Warehouse Operative. The practical assessment should cover the learning outcomes listed as 'skills'. Grading boundaries are Distinction - 90% + and Pass - 70% in both assessments.
